DETAILED ACTION

Since this application is eligible for the transitional procedure of 37 CFR 1.129(a), and the fee set forth in 37 CFR 1.17(r) has been timely paid, the finality of the previous Office action is hereby withdrawn pursuant to 37 CFR 1.129(a). Applicant's 37 CFR 1.129(a) submission after final filed on 20 August 2001 has been entered.

The Examiner and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to **Examiner Ulrike Winkler**, Group Art Unit 1648.

The examiner has renumbered the claims as follows. Claims 1-4 have been renumbered to the original claims numbers 10-13, claims 5-9 have been renumbered to the original claim numbers 20-24 and claims 10-15 have been renumbered to the original claim numbers 14-19. The newly added claims 16-32 have been renumbered 25-41. Applicant is advised that subsequent communication must utilize these new number designations.

Claim 24 has been canceled by the amendment filed 20 August 2001.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-23, 25-31, 40 and 41 drawn to an immunogenic composition and a method of making the immunogenic composition as it reads on herpes virus, classified in class 424, subclass 231.1.

Art Unit: 1648

- II. Claims 32-38, drawn to a nucleic acid, classified in class 536, subclass 23.1.
- III. Claim 39, drawn to a method of producing a truncated membrane free polypeptide, classified in class 435, subclass 69.1.
- IV. Claims 41, drawn to an immunogenic composition comprising a truncated membrane free polypeptide derived from influenza virus, classified in class 424, subclass 206.1.
- V. Claims 41, drawn to an immunogenic composition comprising a truncated membrane free polypeptide derived from foot and mouth disease virus, classified in class 424, subclass 216.1.
- VI. Claims 41, drawn to an immunogenic composition comprising a truncated membrane free polypeptide derived from hepatitis virus, classified in class 424, subclass 206.1.
- VII. Claims 41, drawn to an immunogenic composition comprising a truncated membrane free polypeptide derived from vesicular stomatitis virus, classified in class 424, subclass 224.1.
- VIII. Claims 41, drawn to an immunogenic composition comprising a truncated membrane free polypeptide derived from rabies virus, classified in class 424, subclass 224.1.

The inventions are distinct, each from the other because of the following reasons:

Groups I, II and IV-VIII are compositions and are distinct from Group III which is drawn to a method. Groups I, II and IV-VIII are compositions and are distinct from each other because they contain different materials. Group I comprises epitopes to herpes virus. Group IV

Art Unit: 1648

comprises epitopes to influenza virus. Group V comprises epitopes to foot and mouth disease virus. Group VI comprises epitopes to hepatitis virus. Group VII comprises epitopes to vesicular stomatitis virus. Group VIII comprises epitopes to rabies virus. The epitopes from these groups are not only distinct based on the amino acid sequences they encode, they are distinct because they are from different families of viruses. The disease pathology, etiology of one virus is not the same of another virus from these groups. Group II is set apart from the other groups because it is drawn to nucleic acids, which are structurally distinct from amino acids. Group III is drawn to a method of producing a truncated membrane-free polypeptide by transfecting a host cell with a nucleic acid molecule. Therefore, the search for one group will not be coextensive with the search for the other groups.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
